TECHNICAL FEATURES OF U-FLOW	
Voltage	220-240 V
Frequency	50/60 Hz
Electrical insulation	Clase I
Total power	420W – 1.500 W
Consumption	3,2–6,4 A
Motor power	420 – 1.100 W
RPM	19.000 – 30.000 rpm
Heating resistance power	400 W (Interruptor ON/OFF)
Drying time	8-10 s
Air speed	252-350 km/h
Air temperature	40 °C
Protection index	IP23
HEPA filtering medium	As standard
Plug-In system Ionizer	As standard
Ionizer	As standard
Machine diagnostic system	As standard
Water reservoir	As standard
Water tank Possibility of drainage connection	As standard

Feel free with U-flow®

Hands always visible

No contact

100% pure air

The only hand dryer on the market that provides absolute freedom of movement thanks to its innovative shape, designed to offer a complete sense of well-being and hygiene with each drying.

Energy efficiency

Energetically efficient drying, allowing for up to 98% energy savings. Total hygiene Incorporates a Hepa filtering

Plug-in Technology

A system that allows for the easy, quick, and safe replacement of the U-Flow hand dryer in just 10 seconds, for a bathroom always ready.

Total hygiene

Incorporates a Hepa filtering system + Biocote antibacterial additive + Ionizer that eliminates all harmful action of viruses and bacteria.

HEPA filtering medium

BioCote® antimicrobial technology,

Ionizer that purifies the air.

Drainage

No splashing on the floor

Incorporates two removable water tanks or the possibility of direct connection to the drain, to collect excess water and prevent splashing on the floor.
