PUBLIC RESTROOMS THAT ARE TRANSFORMED INTO UNIQUE SPACES

At **Mediclinics**, we believe every detail in design counts. We expertly blend functionality, design, and user experience in every product, transforming public restrooms into sophisticated and memorable spaces. From cutting-edge hand dryers to modern, safe changing stations, our products are manufactured with high-quality materials and rigorously tested to meet the highest certification standards. This guarantees durability, efficiency, and easy maintenance, making them ideal for demanding projects.

With over 50 years of experience, **Mediclinics** is the perfect partner for those seeking innovative, elegant, and functional solutions that set trends and turn spaces into true works of style.

01

All our hand dryers are certified to guarantee efficient and reliable operation during their lifetime. Our range includes fast, hygienic and silent drying models, ideal for both high traffic restrooms and exclusive spaces.

They ensure optimal HYGIENE **through a HEPA media filter that retains viruses, bacteria and contaminating particles**, while ION HYGIENIC® technology improves air quality. In addition, the use of BIOCOTE® inhibits the growth of microorganisms on the surface.

Mediclinics' hand dryers are **energy-efficient** and provide quick drying with minimal environmental impact, therefore becoming an ECO-FRIENDLY solution for all settings.

They help generate SAVINGS with each use, offering **lower operational costs** compared to both paper towels and traditional dryers, ensuring reduced waste and enhanced efficiency.

HAND DRYERS

01

U-flow®

Designed for those who **value total freedom of movement and hygiene**, this unique hand dryer combines cutting-edge aesthetics with innovative functionality.

Its unique shape ensures a drying experience that not only guarantees hygiene and comfort, but also an incomparable **feeling of well-being.**

The perfect solution for high-traffic restrooms. Ideal for spaces where design, energy efficiency and state-of-the-art technology are essential.

PVD

PVD (Physical Vapor Deposition) is an advanced coating technique that offers a high quality finish, durability and aesthetics. Available colors: gold, copper, bronze and anthracite finish.

SOPHISTICATION

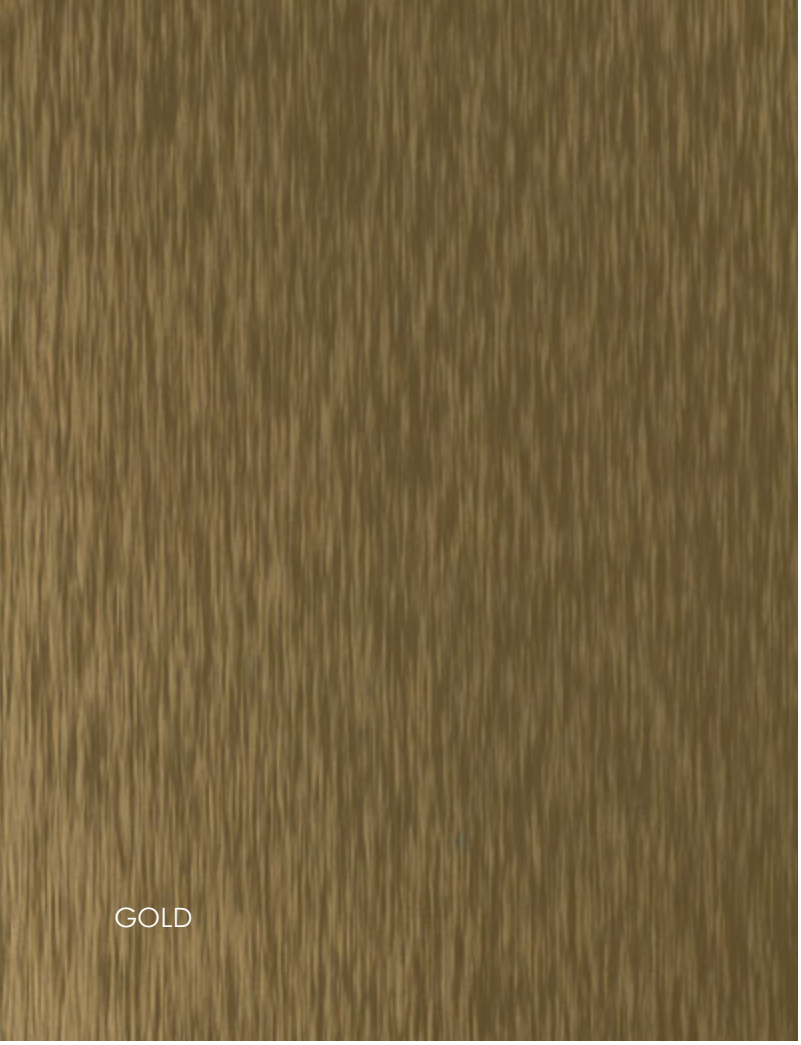

Metallic finishes provide an appearance of luxury and sophistication. The color's stability ensures long-lasting brightness.

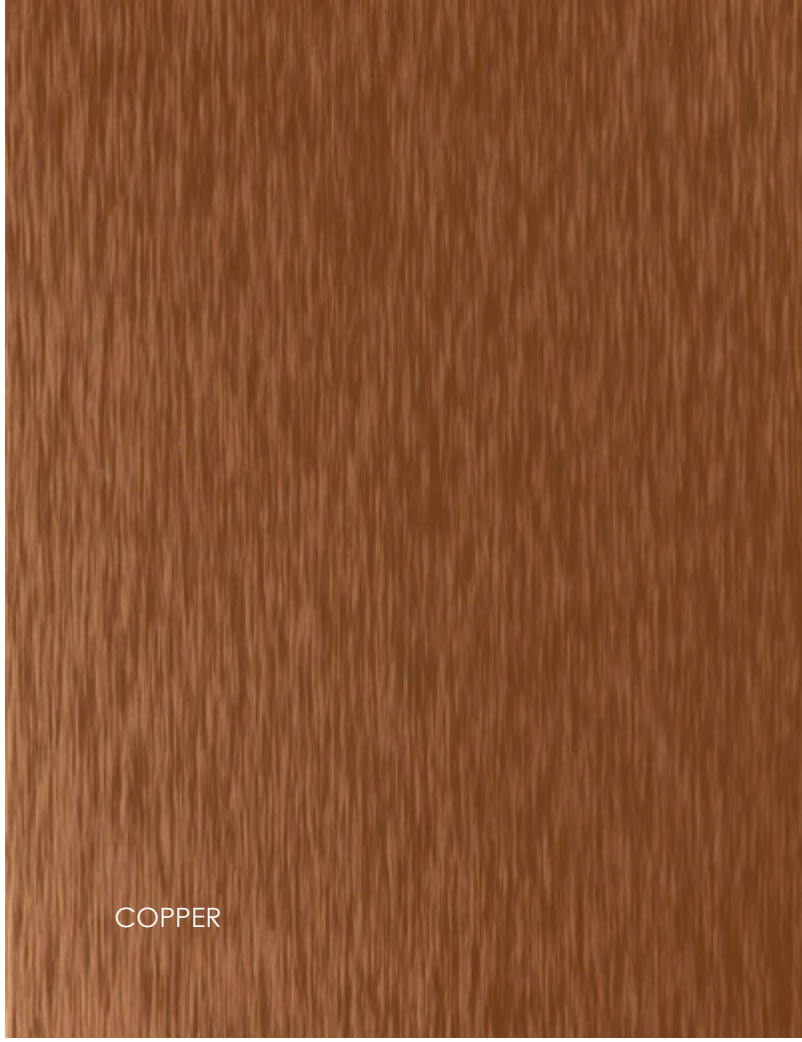

RESISTANCE

Provides greater resistance to wear, abrasion, corrosion and scratches, prolonging the product's life and guaranteeing a superior quality finish.

SUSTAINABILITY

PVD is eco-friendly, being free from harmful chemicals and not producing hazardous waste.
